

Leading the Industry We Invented, **Again.**

Introducing the New Composite **Suction Housing** and **Control Cover**

Our new composite enhancements strengthen the powerful design and reliability of E/One's grinder pump, and continue to set a higher standard for pressure sewer technology.

Details

- ▶ Standard for all E/One cores
- ▶ Engineered thermoplastic composite
- ▶ Replaces cast iron suction housing and control cover

Features

- ▶ Robust, powerful design
- ▶ Composite suction housing has a built-in pump liner
- ▶ Backwards compatible (interchangeable with old cast iron parts)

Benefits

- ▶ **Pump weight reduced by more than 20 lbs / 9 kg**
- ▶ Composite parts will not corrode
- ▶ Improved serviceability

Composite Suction Housing: Released May 2024
Composite Control Cover: Available December 2024

Environment One not only created the grinder pump category, but consistently leads the industry both in system deployment and innovation. E/One remains dedicated to total quality, continuous improvement and extreme customer satisfaction.
